Bullard IZ3 Goggle User Manual

Attaching IZ3 Goggle to the Bullard UST, FX or PX Helmet:

Step 1: Remove chin strap anchor blocks using a Phillips head screwdriver.

Step 2: Remove inner shell from helmet.

Step 3: To install the goggle, take the attachment key on Nomex® strap and fold down against strap so that it lies flat on top of strap (Figure 1).

Step 4: Insert the attachment key between the inner shell and the liner in rear of the liner assembly. (The attachment key resembles the suspension keys that are already in place around the liner.)

Step 5: Insert the liner assembly back into the helmet by aligning the mark on the helmet with the arrow on the back of the inner shell and push together.

Step 6: Reassemble chin strap with anchor blocks onto helmet by using screws and spacers provided (in place of faceshield bracket if replacing a faceshield).

Step 7: Remove protective cover from lens.

Step 8: Place the goggles on the front of the helmet by bringing them under the front brim and pulling them up to their rest position above the brim.

Placing Goggle on the Face:

Step 1: Pull down over front brim of helmet.

Step 2: Place goggle over eyes.

Step 3: Pull end of straps to tighten (Figure 2).

To loosen the goggle pull out on goggle speed clips (Figure 2).

Contamination and Decontamination

Special precautions must be taken if your protective helmet becomes contaminated with chemical or biological hazardous materials. The guidance for these precautions should be coordinated with the appropriate (local, state, and federal) authorities having jurisdiction for hazardous materials (HAZMAT).

Contaminated helmet ensembles should be isolated, contaminate(s) identified, and bodily contact should be avoided. Avoid spreading the contamination to interior spaces of buildings or vehicles, any living quarters, or personal belongings. If possible, seal the contaminated ensemble in a leak proof, sealable, air tight container. Disposal should be done in adherence to local, state, and federal laws. If the helmet is to be reused, it MUST be decontaminated before reuse. Decontamination should be performed using procedures established by decontamination professionals that will remove contaminate(s) while minimizing damage or compromise to the helmet. Failure to do so could result in increased risk of injury, illness, disease, or death.

Store goggles in a cool, dry place away from direct sunlight.

⚠ CAUTION

This goggle should be installed only on Bullard helmets which meet the structural fire fighting protective helmet requirements of NFPA 1971, 2007. Removing the faceshield from any other NFPA helmet will void NFPA certification. Failure to observe these instructions may result in minor or moderate injury and/or equipment damage.

⚠ WARNING

The Bullard IZ2 and IZ3, are the **only** goggles approved for use on Bullard firefighting helmets! Use of any other goggle will void the helmet's NFPA certification and could result in death or serious injury.

READ ALL INSTRUCTIONS AND WARNINGS BEFORE USING THIS PRODUCT. ONLY THE END USER MAY SEPARATE THIS MANUAL FROM THE ELEMENT. MANUAL MUST BE REMOVED PRIOR TO PUTTING THE HELMET INTO SERVICE. PLEASE SAVE THIS MANUAL FOR FUTURE REFERENCE.
